ECONOMICS 100A: MICROECONOMICS, Part A

Fall 2008
Lecture 1: TT 8:00-9:20 CENTR 101
Lecture 2: TT 9:30-10:50 CENTR 101

Class Web Page: http://econ.ucsd.edu/~jandreon/100A/ and WebCT

Professor:
James Andreoni andreoni@ucsd.edu Office: Economics 215
Office Hrs: Monday 1:00-2:00pm

Discussion Sessions and Teaching Assistants
Lecture 1:
B01 Th 8-8:50p PETER 104 Furchtgott, Michael mfurchtg@ucsd.edu
B02 F 2-2:50p WLH 2204 Kravitz, Troy tkravitz@ucsd.edu
B03 F 4-4:50p CSB 001 Lin, Charles chl083@ucsd.edu

Lecture 2:
C01 F 3-3:50p CSB 001 Sprenger, Charles csprenge@ucsd.edu
C02 F 9-9:50a HSS 1330 Dastrup, Samuel sdastrup@ucsd.edu
C03 Th 7-7:50p CSB 002 Hooper, Ashley ahooper@ucsd.edu

Prerequisites: Econ 1 and either Math 10C, 20C, or 21C.

Assessment: There are two in class midterm exams, Tuesday October 22 and Thursday, November 13th each of which is worth 30% of your grade. The final exam is cumulative and is worth 30% of your grade. The final is listed on the UCSD course schedule. Online homework will count 10% of your grade. See below on Homework.

Course Objectives: As the first of the microeconomic sequence, Econ 100A is designed to teach you how to set up, solve and analyze optimization models and apply these mathematical models to the theory of the consumer (commodity demand, labor supply and consumption/savings decisions). Finally we will examine the fundamentals of decision making under risk and uncertainty.

Course Materials:
Required Textbook and Reading:

Additional Readings: There are many textbooks you can use to supplement Perloff. Other calculus-based intermediate textbooks include Walter Nicholson’s, Microeconomic Theory, Hal R. Varian’s, Intermediate Microeconomics and Binger and Hoffman’s, Microeconomics with Calculus. You can get an e-book version of Varian’s text for half price at www.nortonebooks.com
One free option is an online introductory textbook written by Preston McAfee of Caltech http://www.introecon.com/. The level of this book is between Econ 1 and Econ 100A. It is very interesting, free, and you may find it useful.

Mathematics Tutorial for Economists: Written by Martin Osborne at the University of Toronto http://www.economics.utoronto.ca/osborne/MathTutorial/index.html, Chapters 1-6 of this will help you review the calculus tools that you learned in Math 10ABC or 20ABC that are the most important for this course.

WebCT: This is where you access the syllabus, class handouts, homework assignments, etc.

Weekly Homework: It is tremendously important that you keep up with the course, and that you practice solving economic problems. We give you two incentives for keeping up.

1. Online homework. Each week there will be online homework through Aplia. This will cost you $35 to register for Aplia. Look for an announcement on WebCT for how to sign up to Aplia. This homework will be graded automatically by Aplia and reported to us.

2. Written homework. We will periodically also post homework assignments. During your discussion session (see below) the TAs will help you work on the homework assignment for that week. We will post the homework answer key one week after the problem set is assigned. These homeworks are voluntary, not graded, but are the most important part of the course. To make the most of your time in this course, do these homeworks.

Discussion Sessions: These sessions will be conducted by the TAs. Please go to one the TA sections for you are registered for!!

Administrative Issues:

(1) If you have a documented disability, please bring your documentation and come to talk to me as soon as possible so that I can make suitable accommodations for you. If you believe that you have a disability and desire accommodation, please register with the Office for Students with Disabilities, Building 202 University Center as soon as possible. For information on the steps for academic accommodation, please see http://www-senate.ucsd.edu/manual/appendices/app3.htm.

(2) Any student found guilty of academic dishonesty will earn a failing grade for the course. In addition to this academic sanction that I will impose, the Council of Deans of Student Affairs will also impose a disciplinary penalty. For a review of UCSD policy, please see http://www-senate.ucsd.edu/manual/appendices/app2.htm.

(3) You will only need a pen or pencil for exams. Exams are closed book and you may not use notes. Exams are completely electronic-free: no calculators, headphones, cell phones, etc. are to be used during an exam.

(4) If you arrive late to an exam, I will allow you to take the exam in the time that remains as long as no one has turned in his/ her exam and left the room. Once a classmate has turned in his/her exam, you will earn a zero on the test if you arrive late.
(5) If there is a mistake adding up the points on your exam, then bring it to my attention within one week of the exam being returned and I will correct it. If you believe an exam has not been graded properly, you may request a regrade within one week of the exam being returned. I will regrade your entire exam. The regarded score will be your grade for the exam. You may not ask for another regrade or go back to your first grade.

(6) UCSD now has automated waitlists. If you have any questions regarding adding the class, please refer to Triton Link at https://tritonlink.ucsd.edu/portal/site/tritonlink-preview/menuitem.b4448692267a11256ec5e210514b01ca?storyID=17736%20or contact the undergraduate advisors in Sequoyah Hall 245. The economics department does not allow late additions (additions after the second week) to any class.
# ECONOMICS 100A: MICROECONOMICS, Part A

## Schedule of Topics and Lectures.

<table>
<thead>
<tr>
<th>Week</th>
<th>Text, Math Handout</th>
<th>Topic</th>
</tr>
</thead>
<tbody>
<tr>
<td>(0) 9/25</td>
<td>Chapter 1 &amp; 2, Calculus Appendix, A.1-A.3</td>
<td>I. Introduction</td>
</tr>
</tbody>
</table>
| (1) 9/30 | Chapter 3: 60-74 | II. Consumer Preferences:  
A. Axioms of Rational Choice  
B. Utility Functions  
C. Level curves of utility function: Indifference Curves  
D. Marginal Rate of Substitution  
III. Common Utility Functions: Cobb-Douglas, Perfect Complements (Leontief), Perfect Substitutes, CES |
| (2) 10/7 | 74-75 & Calculus Appendix, A.4-A.6, Machina Handout | IV. The Budget Constraint  
V. Mathematical Review of Optimization |
| (3) 10/14 | 75-89 | VI. Utility Maximization and Demand Functions |
| (4) 10/21 | Chapter 4: 93-110 | Midterm 1: Tuesday, October 21  
VII. Comparative Statics of Demand  
A. Income changes  
B. Price changes (income and substitution effects) |
| (5) 10/28 | Chapter 4: 111-126 | VII. Comparative Statics of Demand (continued)  
C. Compensated price changes and compensated demand functions.  
D. Slutsky Equation |
| (6) 11/4 | Chapter 5, 130-152 | E. Demand Relationships among goods  
F. Measures of Consumer Welfare |
| (7) 11/11 | | F. Measures of Consumer Welfare (continued)  
Midterm 2: Thursday, November 13th |
| (8) 11/18 | Chapter 5: 152-164 | Supply of Labor: The Labor-Leisure Decision  
Supply of Saving: The Consumption-Savings Decision |
| (9) 11/25 | Chapter 16 | Decision Making under Risk and Uncertainty |
| (10) 12/2 | | Thanksgiving Holiday Nov 27  
Decision Making under Risk and Uncertainty (continued) |
