Preliminary --- Subject to Change ECONOMICS 200A – Part 2 MICROECONOMIC THEORY --- MARKETS AND WELFARE

A principal text for the course is Starr, *General Equilibrium Theory: An Introduction*, the second edition on the course website. Let Ross know of typos or errors. In addition we will use Mas-Colell, Whinston, and Green, *Microeconomic Theory*, Varian, *Microeconomic Analysis*, *3rd edition*, Kreps, *A Course in Microeconomic Theory*.

Items shown with a bullet (•) are required reading for Economics 200B. Items shown with an asterisk (*) on the syllabus were once designated by the UCSD Economics faculty as sufficient preparation for the qualifying examination in microeconomics for these topics. *-designated material overlaps and extends •-designated material; suggestion: read both. Material denoted by a dagger (†) is intended to provide additional depth and breadth for the topic presented but is not intended to appear on a class or qualifying examination.

There will be weekly problem sets required. There will be a take-home final exam.
