

### **Data and Code for Lecture Slides 3**

Run `slides_3a_210C.m` to replicate slides 1-3.

Run `slides_3b_210C.m` to replicate slides 4-9, then run `slides_3c_210C.m.m` to replicate slides 10-11. `slides_3b_210C.m` calls the script `RBC_solve_sim.m`

Custom functions called by the scripts are contained in the folder `All_functions`.

`slides_3bc_210C_simpl.m` and `RBC_solve_sim_simpl.m` are shortened and simplified versions. Run `slides_3bc_210C_simpl.m` to calculate statistics and impulse responses from the RBC simulation.
