1 Course Objectives

This course examines open-economy macroeconomics and international finance. Topics include theories of the exchange rate, foreign exchange regimes, current account adjustments, and international portfolio investments. The course investigates real and monetary explanations, and implications of international capital market integration.

2 Prerequisites

Instructor's consent.

3 Readings

Textbook: Obstfeld and Rogoff (1996)

Further readings: Goldberg and Knetter (1997), Bernanke and Gertler (1990), Obstfeld and Rogoff (2000b), Neely and Sarno (2002), Froot and Obstfeld (1991), Driffill and Sola (1998), Dornbusch (1976), Diamond and Dybvig (1983), Obstfeld (1996), Morris and Shin (1998), Obstfeld and Rogoff (1995), Tirole (2003), Céspedes, Chang, and Velasco (2000), Obstfeld and Rogoff (2000a), Lane (2001)

The additional readings are available through the class web page (see link above) and the UCSD electronic library. They are also available as printed custom materials from AS Soft Reserves (copyright fees apply).

4 Problem Sets

There will be three problem sets, due on scheduled dates throughout the quarter. You are encouraged to work on the problems with your classmates. Your solutions to the problem sets will be checked (check/no check) but your performance on them does not become a formal part of the final grade.

5 Research Paper Proposal

You may choose to submit a research paper proposal as part of your course work. I strongly encourage this.

The detailed proposal should be 5 to 10 pages in length. A proposal includes a thorough review of the related literature, and a detailed outline of a theoretical model along with its conjectured implications *or* a detailed discussion of a data set and an estimation procedure along with its identifying assumptions. A draft of the paper proposal is due on Wednesday, Nov 24, 5:00p and the final proposal is due on Thursday, Dec 2, 5:00p.

6 Assessment

There will be a final exam during finals week, but no midterm exam. The problem sets help you prepare for the final exam. The exam will take 180 minutes (180 points). You have two options for your assessment.

1. You can take the final exam only (180 points; score multiplied by 5/3.)
2. You can choose to submit a detailed research paper proposal. (A draft of the paper proposal is due on Nov 24, 5:00p and the final proposal is due on Dec 2, 5:00p.) Under this option, the final paper proposal counts for 40 percent of your grade (120 points) and the final exam for 60 percent (180 points).
