

Vincent Crawford

"Theory and Evidence on Strategic Thinking, with Applications"

Monday 30 April 2012  
10.30 until 17.30

*SIRE is delighted to announce a specialist training session with Vincent Crawford who will be discussing "Theory and Evidence on Strategic Thinking, with Applications", scheduled to take place on Monday 30 April 2012.*

Vincent Crawford is the Drummond Professor of Political Economy at the University of Oxford and is one of the world's leading researchers in game theory and behavioural and experimental economics.

We are indeed lucky that he has agreed to teach a short course on his recent work in Edinburgh. It concerns both theory of behaviour in strategic situations and how to test and estimate these models with experimental data. Thus it should be of great interest to anyone working in theory, in experiments or in applied microeconomics.
